Results driven, reliable and thorough, with a proven track record of deploying large applied AI applications end to end in cloud environments and running them in production. At ai71 that is Ask, the company's flagship enterprise AI product, delivered to customers including into their own private cloud. The remit is the whole of Ask: ai71's own environments and every customer deployment, from the cluster up to the application.

Experience

DevOps Engineer, ai71 04/2026 – Present

Customer production: Only DevOps engineer on a customer's production platform through go-live preparation and an incident week; the DevOps voice on daily calls with the customer and their hosting provider; the customer's node-migration decision followed my stress-test one-pager.

- Took over responsibility for the platform two weeks before go-live, identified the critical readiness gaps and closed them in 12 days: 9 of 9 databases restore-verified, 300 concurrent users load-tested. It went live on the planned date and the customer signed off the implementation.
- On a production upload incident, went from report to validated fix the next day with zero downtime: found in the source the bug capping ingestion in every deployment, and the fix went into the product before a second customer hit it.
- Same week: restored production document generation 57 minutes after the report; traced an upload outage to the hosting provider's object storage in 12 minutes, nothing rolled back.
- Fixed a customer's staff single sign-on: read the cause from the identity provider's event store and changed one field, clearing a blocker on the customer's staff rollout.
- Deployed Superset on a second customer's production Azure Kubernetes cluster by GitOps; in-app analytics live in one evening, clearing the customer's condition for a wider rollout.

End-to-end build: Deployed Ask and everything under it into a customer's private cloud, as sole author.

- Terraform bootstrap of Argo CD, then one GitOps change: the four application services with their Postgres clusters, vector store, object storage, workflow engine, identity and observability, 29 workloads on a bare 11-node cluster in 3 days; the customer tests there before production.

Internal platform and team: Runs ai71's two internal Ask environments, where the product squads build and test, and the shared CI/CD pipelines behind their merge requests.

- Traced an organisation-wide CI build outage to a rate limit in the shared build template; restored staging the same morning and merged the fix for the 13 repositories that use it.
- Upgraded the workflow engine across 21 releases on shared staging, rollback dump held, an upstream migration projected at over 4 hours cut to 4.5 minutes; no outage in a customer demo week.
- Found 8 defects in the product's application code from its source and live reads, and secrets being baked into a customer-bound image by its build pipeline; the owning teams fixed 3 upstream.
- Chosen by the team council to build the team's AI-assisted deployment workflows, since made team strategy; wrote the MLOps guide for 14 engineers, reviewed by the MLOps lead and used in the team's weekly sessions.

Self-directed Training and Portfolio 09/2024 – 04/2026

- Homelab Kubernetes cluster and portfolio builds on AWS, Azure and GCP: zero-trust, supply-chain security, observability (noahfrost.co.uk).
- DevSecOps bootcamp, September to November 2024.

Police Constable, Metropolitan Police 02/2022 – 09/2023 | London, UK

- Wrote reports to the evidential standard for prosecution.
- Made time-critical decisions with incomplete information at active incidents.

Certifications

CompTIA Security+ | **AWS Certified Cloud Practitioner** | **HashiCorp Certified: Terraform Associate**

Skills

Delivery: Kubernetes, Helm, Argo CD, GitOps, GitLab CI/CD, GitHub Actions, Docker

Infrastructure and cloud: Terraform, Azure (AKS), AWS, HashiCorp Vault, External Secrets, Linux, Bash

Platform: LiteLLM, vLLM, PostgreSQL, SAML, Weaviate, Qdrant, MinIO, SigNoz, Sentry

Education

Law (Criminal Justice) LLM, Northumbria University 09/2023 – 09/2024

Criminology BSc (Hons), University of Chester 09/2016 – 09/2020
